Career Objective

Passionate MERN-Stack Developer seeking to build efficient, scalable, reusable, and user-focused web applications. Eager to contribute technical expertise in React, Node.js, MongoDB, and Firebase to deliver innovative digital solutions and grow in a dynamic team environment.

Technical Skills

- **Frontend:** React.js, JavaScript (ES6), HTML5, CSS3, Tailwind CSS
- **Backend:** Node.js, Express.js, RESTful APIs, JWT Authentication
- **Database:** MongoDB
- **Authentication & Hosting:** Firebase, JWT, Vercel, Netlify
- **Version Control & Tools:** Git, GitHub, VS Code
- **Others:** JSON, CRUD operation, Responsive Design, API Integration, Problem-solving

Soft Skills

- Communication
- Team-building
- Time Management
- Organizing

Projects

TaskAxis - Task Management and bidding platform

[Live Site](#) | [GitHub](#)

- Developed a MERN app for bidding and managing service tasks.
- Integrated Firebase Auth, role-based dashboard and real-time task management.
- Deployed frontend and backend separately using Vercel and Netlify.

ScrollySpace - React-Powered Content & Bookmarking App

[Live Site](#) | [GitHub](#)

- Developed a React app with smooth UI, dark/light theme toggle, and live content fetching from external APIs.
- Implemented bookmarking system, dynamic routing with React Router, and responsive design with TailwindCSS & DaisyUI.
- Enhanced user experience with toast notifications and interactive components.
